

## Moani™ Dry Live Rock

Usable shapes and sizes, incredible porosity, subtle colors, and pest free performance make Moani the go-to rock for just about any marine or reef system. Moani travels dry, but is infused with living, spored bacteria for effective cycling and a fast start up. No curing required, and always available Moani Dry Live Rock is real aragonitic calcium carbonate rock ready to use and will not skyrocket pH or alkalinity. Moani is the safe, reliable, and affordable alternative to wild collected live rock. Retail dry or tanked.

New LifeRock Shrooms take your reef tank to a new level! So useful, LifeRock Shrooms can be placed flat size down for stable pinnacles with plenty of nooks for frags both high and low. Or puzzle piece in your own aquarium rock bed on the bare glass tank bottom, fill the crevices with sand, and have a firm reef bottom on which to build. Turn them flat side up, and have a tree style platform with plenty of holes on top easy frag placement. Use multiple Shrooms, and boost or drop to vary heights, and your reef becomes a dramatic, multi-level coral forest full of surface area while still maintaining nice open areas and good circulation patterns. As with all LifeRock varieties, Shrooms are infused with living, spored bacteria to compress your cycle and need NO curing. For the same shape and performance as LifeRock Shrooms but with less color, Moani Shrooms are the perfect alternative.

- IDEAL FOR REEF PINNACLES
- PERFECT FRAG PLATFORM
- CREATE MULTI-LEVEL SHELVES
- PUZZLE PIECE ROCK FLOORING
