

# OMEGA-BOOST

Concentrated HUFA emulsion for Artemia enrichment

Omega-Boost is a stable emulsion that contains all the necessary nutrients to complete the nutritional profile of Artemia nauplii. Purified oils with high levels of selected fatty acids are blended with fat-soluble vitamins and natural astaxanthin pigments, which have both in-vitro and in-vivo antioxidant properties, protecting not only the sensitive lipids in the product, but also in the tissues of fish and shrimp larvae.

- ◆ Strong boost with fat-soluble and antioxidant vitamins
- ◆ Excellent emulsifying properties (easy mixing)
- ◆ Major improvement of hatchery efficiency
- ◆ Ready-to-use

## Ω-BOOST 3

DHA/EPA ratio of minimum **3**  
for an efficient and prolonged supply  
of essential omega-3 and omega-6  
fatty acids

Crude fat:	66.0%
Crude protein:	0.1%
Crude ash:	0.8%
DHA (22:6ω3):	150 mg/g DW
EPA (20:5ω3):	50 mg/g DW
ARA (20:4ω6):	10 mg/g DW
Vitamin A:	150,000 IU/kg
Vitamin D3:	15,000 IU/kg
Vitamin E:	3,600 mg/kg

Available in bottles of 1kg

## Ω-BOOST 5

DHA/EPA ratio of minimum **5**  
to maximize DHA content and ratio  
over shorter periods and for more  
demanding species

Crude fat:	66.0%
Crude protein:	0.1%
Crude ash:	0.8%
DHA (22:6ω3):	270 mg/g DW
EPA (20:5ω3):	50 mg/g DW
ARA (20:4ω6):	20 mg/g DW
Vitamin A:	150,000 IU/kg
Vitamin D3:	15,000 IU/kg
Vitamin E:	3,600 mg/kg

Available in bottles of 1kg
