# Reef Pulse

The heartbeat for your corals

- Reef Pulse, a high quality coral food powder, is an innovative blend of selected zooplankton and phytoplankton.
- Caters to the unique nutritional needs of many SPS and LPS coral species, tube worms and other omnivorous filter feeders.
- Results in excellent polyp extension.
- The wide particle size range from 5 to 400 micron makes it an ideal diet for a large variety of coral species (like Euphyllia, Acropora, Montipora, Scolymia, Goniopora, Zoanthids,...).
- With highly digestible marine proteins and free amino acids, the building blocks for reef organisms.
- Continued use of Reef Pulse results in faster growth and more intense coloration.
