

KRILL

KRILL PACIFICA

- ◆ *Krill Pacifica (Euphasia pacifica) are shrimp-like invertebrates of approximately 2,5 cm long, collected in the cold waters of the Pacific Ocean*
- ◆ *The ideal food for many freshwater or marine fish*
- ◆ *Krill is one of nature's best food source, as it is high in proteins, amino acids, omega 3 fatty acids, vitamins and highly unsaturated fatty acids.*
- ◆ *Naturally rich in astaxanthin, a powerful antioxidant and carotenoid, which improves the resistance against parasites and intensifies coloration.*
- ◆ *Originating from pure, clean pacific waters*
- ◆ *Processed in legally approved fisheries and in accordance to the FAO Code of Conduct for responsible fisheries*
- ◆ *Flash-frozen to ensure freshness, maximum nutrition and whole animals*

KRILL SUPERBA

- ◆ *Krill Superba (Euphasia superba) are shrimp-like invertebrates of approximately 5cm long, collected in the cold waters of the Antarctic*
- ◆ *Readily accepted by both larger marine or freshwater fish*
- ◆ *Krill is a superior food, as it is rich in proteins, amino acids, omega 3 fatty acids, vitamins and highly unsaturated fatty acids.*
- ◆ *It naturally contains the powerful antioxidant and carotenoid astaxanthin. Reduces inflammation, increases energy recovery and intensifies coloration*
- ◆ *Originating from pure, clean arctic waters*
- ◆ *Processed in legally approved fisheries and in accordance to the FAO Code of Conduct for responsible fisheries*
- ◆ *Flash-frozen to ensure freshness, maximum nutrition and whole animals*
