*Preserving Life and Beauty through Nutrition*

## *Color, Growth & Health Formula*

*A top performance diet for in-store feeding*

For  
professional  
use only!

[www.oceannutrition.eu](http://www.oceannutrition.eu)

- ✓ *Ideal for in-store feeding of marine ornamental fish.*
- ✓ *High in protein and energy to exclude underfeeding and to bring the fish in excellent shape ready for sale.*
- ✓ *A blend of various carotenoids will contribute to the enhancement of the fish's vivid colors.*
- ✓ *Highly digestible ingredients result in minimal pollution of the filtration systems and thus contribute to a more stable environment.*
- ✓ *With fresh garlic, immunostimulants and a high level of vitamin C to boost recovery and improve stress resistance.*
- ✓ *Rich in highly unsaturated fatty acids (HUFA).*
- ✓ *Also easily accepted by newly acquired wild caught fish.*

## USE

This formula is for professional use only!

This very strong food is specially formulated to raise young fish who have high nutritional requirements. Therefore this formula is used by professional breeders all over the world.

We strongly recommend this food also for shopkeepers, to reinforce the fish and bring them in top shape, which will help avoiding health problems once they are sold. Additionally, this Color, Growth & Health Formula will also strengthen the fish's immune system, which will help to fight and resist stressed situations while they are still in the shop.

Feed 2 to 3 times a day. Only feed the amount that is consumed within 5 minutes. Feed according to nutritional needs, do not overfeed.

Uniform crumble sizes ensure a fair distribution of food in highly stocked tanks. We recommend a smaller crumble size over a larger crumble size, which will ensure that even the weakest fish have a chance to a proper portion.

## INFO

The Color, Growth & Health Formula for marine fish is a highly palatable and easily digestible diet.

These high quality, slow sinking crumbles have been specially formulated to intensify the coloration, stimulate growth and improve the health of ornamental marine fish.

1. This diet is formulated with an emphasis towards red and orange colors (through the addition of astaxanthin and canthaxanthin), yellow colors (via xanthophylls) and blue colors (phycocyanin). This careful blend of natural pigments is the key to a balanced, strong and vivid coloration.
2. The inclusion of the finest protein sources in this premium formula ensures a high metabolizable energy content. The use of this formula results in an excellent and uniform growth performance, while still maintaining the ideal shape of the fish.
3. This Color, Growth & Health Formula contains all the necessary nutrients (like vitamins, amino acids, ...) and immunostimulants ( $\beta$ -glucans) that are key to the fish's immune system. Research has shown that this diet contributes to a higher stress resistance and therefore provides a better protection against potential diseases.

## COMPOSITION

Protein	59,0 %	Vitamin A	22.500 IU/kg
Fat	13,0 %	Vitamin D <sub>3</sub>	3.000 IU/kg
Fiber	0,7 %	Vitamin E	400 mg/kg
Ash	9,3 %	Vitamin C	1.000 mg/kg
Moisture	7,0 %	Antioxidants	BHA, BHT, Ethoxyquin
Total energy	4.550 Kcal/kg	$\Sigma$ w3 HUFA	25 mg/g (on dry weight)
Metabolizable energy	4.150 Kcal/kg	DHA/EPA	1,5

Fish and fish derivatives, vegetable protein extracts, molluscs and crustaceans, cereals, oils and fats, yeast, algae, vitamins (retinol (vit A), cholecalciferol (vit D3), tocopherol acetate (vit E), menadione (vit K3), thiamine mononitrate (vit B1), riboflavin (vit B2), pantothenic acid (vit B5), pyridoxine (vit B6), cobalamin (vit B12), l-ascorbic acid phosphate (vit C), niacin (vit B3), biotin (vit H), choline (vit B4), inositol (vit B8), folic acid (vit B11)), minerals, carotenoid pigments, preservatives and antioxidants.

## STORAGE

Store in a dry place (max. 25 °C).

For prolonged storage a temperature of 4°C is advised.
