

Worms & Parasites Salt

Cure against worms and parasites for salt water fish

Fish parasited by *Argulus*

PACKAGING

BOX of 6 Vials (5 Worms & Parasites SALT + 1 BioDigest Start)

Useful for a complete treatment of and aquarium between 60 and 180 L and it reseedng.

WORMS & PARASITES SALT intended only for treatment of ornamental saltwater fish infested with skin worms (*Gyrodactylus*), gill worms (*Dactylogyrus*), or tapeworms (*Cestodes*). At the end of the treatment period, the use of BIODIGEST START vial included in the box allows the regeneration of the biological filtration.

Visible symptoms are fish rubbing against the scenery (to get rid of the parasites) in the case of *Gyrodactylus*; increased respiration for *Dactylogyrus*; and weight loss despite normal food intake for *Cestodes*.

At the end of the treatment period, the use of BIODIGEST START allows the regeneration of the biological filtration. BIODIGEST START is made up of natural nitrifying, nitrate reducing and facultative bacterial strains selected for their ability to convert ammonia into nitrites, nitrites into nitrates and nitrates into nitrogen. These bacteria work together with each strain finishing off the work started by the others. Some are capable of biosynthesising nitrate reducing enzymes in aerobic conditions. This enables water to be effectively purified, nitrates and phosphates to be reduced and prevents the spread of filamentous algae. By probiotic effect and food competition, they also fight against the proliferation of pathogens and reduce the risk of unexplained illnesses.

WORMS & PARASITES SALT is a drug intended for ornamental fish, it should not be used to fish for human consumption.

Invertebrates such as corals, snails, seashells and shrimps cannot withstand Worms & Parasites Salt, and must be removed from the aquarium before beginning the treatment.

Aquarium 60 to 100L	
Day 1	Water change : 75% of the volume Do not feed the fish Vials A A A together
Day 2	Water change : 50% of the volume Feed the fish - No treatment
Day 3	Feed the fish - No treatment
Day 4	Feed the fish - No treatment
Day 5	Feed the fish - No treatment
Day 6	Feed the fish - No treatment
Day 7	Do not feed the fish Vials B B together
Day 8	Water change : 50% of the volume Feed the fish - No treatment
Day 9	Water change : 50% of the volume Feed the fish - No treatment Add the vial of BioDigest Start

Aquarium 101 to 180L	
Day 1	Water change : 75% of the volume Do not feed the fish Vials A A A B B together
Day 2	Water change : 50% of the volume Feed the fish - No treatment
Day 3	Feed the fish - No treatment
Day 4	Feed the fish - No treatment
Day 5	Feed the fish - No treatment
Day 6	Feed the fish - No treatment
Day 7	Water change : 50% of the volume Feed the fish - No treatment Add the vial of BioDigest Start
